

Hardwood **PLYBRACE** Panel

NEW
AVAILABLE IN TERMITE TREATED H2-F
FOR COMPLETE FRAME PROTECTION IN
SOUTH OF THE TROPIC OF CAPRICORN

4.0mm AS/NZS 2269

The product of choice for builders where structural integrity really matters.

That's why it is the number one bracing product in high wind load regions.

FSC certified also available

The Gunnensen bracing range now includes 4.0mm thick hardwood plybrace panels that can achieve up to 7.5Kn per metre racking resistance when installed in accordance with the AS1684.2-2006 framing code.

High capacity bracing systems are capable of delivering better outcomes for modern house design. Importantly for merchants and fabricators, stocking Gunnensen 4.0mm hardwood bracing means you have all the common applications covered with one product.

When you build with Gunnensen Hardwood Plybrace you can be sure that you are using a product that complies with Australian standards, and that's because all Gunnensen hardwood bracing is mechanically stress graded at the point of manufacture.

In response to the growth in use of termite resistant framing, Gunnensen are also releasing the new 4.0mm bracing treated to H2-F level. This will make it the perfect partner for complete framing, Gunnensen are also releasing protection in areas south of the Tropic of Capricorn.

PLYBRACE Panel CERTIFICATION EVIDENCE

Above Left: Letter from Watters Electrical Pty Ltd explaining that they have designed and manufactured a three point Modulus of Elasticity stress grading machine that has measured and determined that Gunnersen's Plybrace meets Australian and New Zealand standard AS/NZS 1604: 2004.

This equipment is regularly calibrated by engineers to ensure product quality and standards.

Above Right: Plybrace treatment is certified to ASNZ 1604 and the method of application is registered brand 940 73 H26 under the timber marketing act. 1977 (NSW) (Section 20) Approval of Preservative Treatment and Registration of Brand.

PRODUCT AVAILABILITY CHART

	F27	PACK QTY
2440 x 900 x 4.0mm	yes	50/150
